

SENIOR REACTJS DEVELOPER

About Us: Founded in 2013, Labor Solutions, a social enterprise, leverages technology to engage and educate workers. Our [data](#) sets bring needed transparency to reduce risks throughout workforces and the supply chain. Our tools and services are created using user-centric & inclusive design to engage and connect with the entire value chain of stakeholders.

Through our tools, Labor Solutions aims to improve factory workers' wellbeing, health and financial functions both at workplace and at home. Labor Solutions' flagship product is WOVO, a mobile phone-based worker voice and worker wellbeing tool with more than 1.5 million users and availability in 25 countries and 19 languages.

Our client base is growing rapidly, and we are looking for a qualified **Senior ReactJS Developer (4+)** to join our Tech team. In this role you will be working remotely with the Design , backend & QA team to develop web dashboards and other tools as per the designs agreed by business. You will also be developing the product compatible for QA automation.

What you'll be doing:

- Design and develop scalable, feature-rich web applications using ReactJS and Redux
- Consume REST APIs to power applications
- Work with UI/UX designers to implement user-friendly solutions
- Writing reusable, testable, and efficient code.
- Design and implementation of low-latency, high-availability, and performing applications
- Integration of backend APIs to user-facing elements of front-end development
- Lazyload of modules, components, routes through require.js / system.js
- Maintaining high performance and compatibility across platforms and devices
- Understanding what is needed for a smooth workflow between yourself, the front-end developers, and designers
- Integrate external web services APIs.

Who we are looking for:

- Expert & hands-on on ReactJS and ability to design & develop SPA using components, RxJS /Flux/Redux architecture
- Proficient understanding of web mark-up, DOM including HTML5, CSS3, RWD using Bootstrap, Material Design, Media queries
- Basic understanding of CSS pre-processing platforms, such as LESS and SASS
- Proficient understanding of object-oriented client-side scripting using Typescript, ES6 and JavaScript frameworks.

- Good understanding & hands-on in implementing unit tests
- Understands the lifecycle hooks well and ensures correct usage
- Proficient understanding of code versioning tools, such as Git, SVN, TFS
- Practical knowledge and understanding of web applications and web dashboards.
- Hands-on responsive design experience
- Estimate work and plan delivery schedule including tasks, milestones, and dependencies. Monitor project progress and ensure timely publishing of status report and quality metrics. Should be able to quickly adapt work on new technologies based on project need
- Creative thinking backed by strong analytical and problem-solving skills.
- Strong teamwork, co-ordination, and planning, self-driven, and ability to work at pace in a dynamic organization.
- Translate graphic visual and interactive designs into the presentation layer for highly interactive web and mobile applications using responsive design and development techniques
- Work under minimal supervision in layouts, product support, devices, methods, or procedures Bachelor's or Master's degree in Computer Science, Information Systems, Engineering or equivalent
- 3-5 years of experience in Web Application Design & development
- Added advantage, Good understanding & hands-on in any one of other advanced JavaScript libraries and frameworks, such as Angular, VueJS, KnockoutJS, BackboneJS,

Interested candidates should send their CV to jobs@laborsolutions.tech
